

Psychiatry Certification Examination Review for the Clinical Psychiatry Component Vol. 6 (Psychiatry Review Series for ABPNs Certification Examination)

With 8 case vignettes and over 55 questions, this reviewer is designed to help psychiatry certification exam candidates prepare for the more challenging and tedious Psychiatry C or clinical component of the ABPN exam. To simulate the difficulty of the actual exam, each clinical case vignette has an average of eight questions, followed at the end by answers and explanations. The Psychiatry Certification Examination Review Series for the Clinical Psychiatry Component includes significant helpful features:

- Challenging case vignettes and thought-provoking questions. Each clinical case vignette has at least six questions. For better exam practice, most case vignettes have more than eight questions with answers and explanations;
- Relevant references and suggested reading materials for further reading and review

Through the clinical vignettes that cover a wide range of psychiatric disorders, this Psychiatry Certification Review Series may:

- Sharpen your diagnostic and reasoning skills
- Improve your basic knowledge
- Enhance your familiarity with pharmacologic and psychotherapeutic options
- Understand common psychiatric disorders and syndromes and their comorbidities
