

The Illustrated Directory of American Cars

This book charts the progress of the automobile in America from the beginning of car production, through the explosive automotive creativity of the 1950s and into the future of the automotive industry today. It highlights the work of the big three, Ford, Chrysler, and General Motors, and the smaller companies who didn't survive the 1930s and 1940s like Crosley, Packard and Studebaker.
