

The Weight of Snow

The Weight of Snow, is the story of a young woman and the secrets, known and unknown that shape her life. When she is told that her mother has left the mental facility where she lives, against doctors recommendations, to instead fend for herself as a homeless woman on the streets of New York, the daughter is reluctant to accept her responsibility to search for her; that is until she begins to be plagued by strange, yet palpable hallucinations, the same hallucinations that long ago made her mother the unwitting cause of her baby brothers death. Unable to heal from the loss of her beloved brother, High John, or from her mothers forgotten betrayal in the matter, the main character has grown up and created an isolated life for herself, entertaining not much more than her painful memories, her painting and a negligible relationship until a number of unsettling events occur. Spurred by the fear that she is being watched and toyed with by someone or something unknown, she takes on the search for her mother as a way to reclaim her own mental stability. Helped by a rose, the friend she was never supposed to meet, and worried over by her elderly neighbor, Mrs. Royal, the protagonists search leads her to a stranger, Noble, a man who knows more than he is telling and whose vague familiarity tickles at the back of her mind. Combing the streets of New York City is just the first step in a search that takes her through old stories, new memories and well beyond, into the lost tunnels and stations beneath the city. Ultimately she will get closer to the family she has been trying to forget than she ever imagined.
