

You Can Run But You Cannot Hide

Protect Yourself Online - You Can Run But You Cannot Hide is all about cyber security online and computer security online. The book is packed with resources demonstrating computer security programs most of which are free to the user. The Internet is packed with hacker, scammers, fraudsters and criminal elements waiting to prey on you and steal your privacy, your money, your security, and in some cases even your life! You Can Run But You Cannot Hide tells you how they do it; how they patiently wait for you to become vulnerable and then they pounce. This book shows you the resources they use, their techniques and then shows you how to protect yourself and even how to become an Internet amateur sleuth. Now the hunters will become the prey. Protecting yourself from identity theft and demonstrating various identity protection services as well as credit fraud protection are two of the most common cyber crimes. Protect yourself today!
